

NOTIZIE FLASH

sono anche i visitatori pre-registrati alle altre quattro mostre che si svolgeranno in concomitanza, nell'ambito dell'evento di filiera The Innovation Alliance: Ipack-Ima, Meat-Tech, Print4All, Intralogistica Italia.

PLASTICS & RUBBERS AT THE FAIR

The whole European plastics and rubber industry will converge from 29 May to 1 June at the Fiera Milano facilities in Rho-Però for PLAST 2018, the International Exhibition for the Plastics and Rubber Industries. PLAST reflects the preeminent global position of the Italian plastics and rubber processing machinery, equipment and moulds industry, which forms the core of the exhibition: over 70% of national production is exported, according to the trade association AMAPLAST. PLAST 2018 thus offers economic operators a full-spectrum technological showcase addressing all the various production processes (from extrusion to blow-moulding, from thermoforming to injection moulding) and applications (packaging, automotive, medical, construction, etc.). PLAST will feature satellite fairs dedicated to three sub-sectors of excellence: RUBBER (in its 3rd edition), 3D PLAST (focusing on additive manufacturing and related technologies, now in its 2nd edition) and PLAST-MAT (1st edition, dedicated to innovative plastics). A jam-packed schedule of technical seminars and company meetings is in the works, providing a full-spectrum view of the latest in materials, processes, machinery and services. But that's not all. At the Art & Plastics area of PLAST 2018 some artists will exhibit works they have created using this versatile material.

Some two months after the opening of preregistration, thousands of operators have already registered online to visit PLAST 2018. Large numbers have also preregistered to visit the four fairs within The Innovation Alliance (Ipack-Ima, Meat-Tech, Print4All, Intralogistica Italia), that will take place in concurrence with PLAST 2018.

MOBILITÀ DA PREMIO

Come parte delle celebrazioni per il 50° anniversario della fondazione, Italdesign ha indetto il concorso Research Contest on Future Mobility in Cities, per la ricerca di soluzioni per la mobilità del futuro nelle

aree urbane. I partecipanti, che dovranno avere un'età compresa tra i 18 e i 35 anni, possono iscriversi attraverso il sito web: futuremobilitycontest.italdesign.it entro il 1° maggio. Il 31 agosto scade invece il termine per la consegna dei progetti, da effettuare tramite portale oppure, in caso di oggetti fisici, spedendoli alla segreteria organizzativa. Una

volta terminata la fase di presentazione dei progetti, un comitato interno a Italdesign li valuterà e sceglierà i dieci migliori che potranno accedere alla fase finale. Stabiliti i dieci finalisti, una giuria internazionale composta da sette professionisti nei campi del design, dell'architettura, dell'urbanistica e del mondo universitario, sceglierà i due
